CAPACITY & VERSATILITY

RADEX® AIRLINE FILTER

ADVANCED FILTRATION CAPACITY & VERSATILITY

Polluted air can be the cause of major health issues and, at the very least, can adversely affect operator comfort and productivity. The RPB® Radex® Airline Filter improves the quality of the air your employees are breathing and exceeds industry filtration standards so you can be assured that your operators won't suffer the consequences of breathing contaminated air.

The filter is fitted with a large capacity, 6-stage filter cartridge that removes moisture, odor and particulates to 0.5 micron from the compressed air stream, providing clean, breathable air. The Radex® features a unique twist-and-lock wall and floor mounting system.

An optional auto drain valve is available to fit to your filter that continually removes moisture from the filter housing, increasing the lifespan of the filter cartridge.

6 OUTLET SYSTEM

Upgrade to the 6-outlet system to provide filtration to six separate airlines from one filter.

1-866-494-4599 | rpbsafety.com

ISO9001
CERTIFIED COMPANY

Quick disconnect coupler that is compatible with brands including Aro, Cejn, Dixon and Rectus.

150 psi safety pressure relief valve.

Claw coupler port.

Outlet pressure regulator provides the ability to adjust air pressure. Range 0-125 psi (04-900 2 outlet unit only).

Replacement filter cartridges have a replacement date sticker for maintenance scheduling.

Strong, robust housing.

Wall and floor mounting system.

Fitted with brass drain tap.

Made in USA.*

*From local and globally sourced components.

WARNING
Read all instructions before using this Radex Airline Filter.
This Radex Airline Filter does not contain carbon monoxide or other toxic gases.
Do not operate this Radex Airline Filter at more than 125psi.
Open drain valve every 4 hours.
See www.rpbsafety.com
Email: info@rpbsafety.com

Next replacement due at 3 months or 450 hours, whichever is sooner.

Replace sooner if:

- There is direct any odor, or visible odours.
- The filter begins to pass moisture through the outlet.
- The outlet pressure falls below 85 P.S.I.
